### Notes on Draft of RI Section 5.5

May 20, 2014

Attached please find the following:

- Section 5.5 – TZW and Seeps
  - This is submitted in track changes and is difficult to read based on the large number of revisions.
  - Viewing in FINAL form might be required/easier to see how it currently looks.
  - A few outstanding issues that were discussed on Friday are identified with comment bubbles and/or highlighted text that include the following:
    - Deep TZW results in the database do not match those summarized in LWG's Table D4-1 (now to be Table 5.5-1) for metals.
    - Lack of seep data in the database for some of the seep locations (as LWG summarized/used only data associated with seeps to which there can be human exposure).
  - The database queries that were used so you can see the issues described above.
